

Accidents procedure

Dealing with an accident

Deal with the child appropriately and with loving care – Use your First Aid knowledge

Call for help from another staff member – ask the 2nd staff member to ensure other children in your care are being supervised and cared for.

If its an emergency – Call for help from senior management

Report accidents of concern to the manager.

Enter the PRECISE details on the accident form on Famly

Entering the details:

Follow the form details and complete each part and on the corresponding picture.

Think about the words you use – how it reads and do not use other childrens names.

Who ever witnessed the accident must be added to to form on Famly

Whoever dealt with the injury must fill out the form on Famly

Head Injuries – Significant (hard bangs, lacerations, swellings) should be reported to the parent by telephone call and noted on Famly

Other injuries – if a child shows further discomfort or pain and/or may require pain relief – inform the parent by telephone call.

Make sure you reflect on your practice and the equipment – could this accident have been avoided? What are you going to do about it?

Explaining to the parent:

Be polite & sympathetic

Give eye contact

If necessary direct them to the staff member that witnessed the accident

Ensure the parent acknowledges the form on Famly.

Accidents and First Aid Policy

At nippers nursery the safety of all children is paramount and we have measures in place to help to protect children. However, sometimes accidents do unavoidably happen.

We follow this policy to ensure all parties are supported and cared for when accidents or incidents happen¹ and that the circumstances of the accident or incident are reviewed with a view to minimising any future risks.

Accidents or incidents

When an accident or incident occurs, we ensure:

- The child is comforted and reassured first
- The extent of the injury is assessed and if necessary, a call is made for medical support or an ambulance
- First aid procedures are carried out where necessary, by a trained paediatric first aider
- The person responsible for reporting accidents, incidents or near misses is the member of staff who saw the incident or was first to find the child where there are no witnesses
- The accident or incident is recorded on an accident/incident form on Famly and it is reported to the nursery manager. Other staff who have witnessed the accident may also countersign the form and, in more serious cases, provide a statement. This should be done as soon as the accident is dealt with, whilst the details are still clearly remembered.
- Parents are sent the accident/incident form and informed of any first aid treatment given. They are asked to acknowledge it the same day, or as soon as reasonably practicable after
- The nursery manager reviews the accident/incident forms at least monthly for patterns, e.g. one child having a repeated number of accidents, a particular area in the nursery or a particular time of the day when most accidents happen. Any patterns are investigated by the nursery manager and all necessary steps to reduce risks are put in place
- The nursery manager reports any serious accidents or incidents to the registered person for investigation for further action to be taken (i.e. a full risk assessment or report under Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR))
- The accident forms are kept for at least 22 years
- Where medical attention is required, a senior member of staff will notify the parent(s) as soon as possible whilst caring for the child appropriately
- The nursery manager or registered provider will report any accidents of a serious nature to Ofsted and the local authority children's social care team (as the local child protection agency), where necessary. Where relevant, such accidents will also be reported to the local authority environmental health department or the Health and Safety Executive and their advice followed

Location of accident files: Locked end cupboard for historic files. On Famly for current after April 2025

First aid

The first aid boxes are located in: **Children Bathroom cupboard, trip bag**

These are accessible at all times with appropriate content for use with children.

The appointed person responsible for first aid checks the contents of the boxes monthly and replaces items that have been used or are out of date.

First aid boxes should only contain items permitted by the Health and Safety (First Aid) Regulations Act 1981, such as sterile dressings, bandages and eye pads. No other medical items, such as paracetamol should be kept in them.

The appointed person(s) responsible for first aid are Kim, Vicky, Katie, Haylie

All staff are trained in paediatric first aid and this training is updated every three years. When new staff start, they are booked onto the next available First Aid training course.

We ensure there is at least one person who holds a current full paediatric first aid (PFA) certificate on the premises and available at all times when children are present.

When children are taken on an outing away from our nursery, we will always ensure they are accompanied by at least one member of staff who holds a current full PFA certificate. A first aid box is taken on all outings, along with any medication that needs to be administered in an emergency, including inhalers etc.

Needle punctures and sharps injury

- We recognise that injuries from needles, broken glass and so on may result in blood-borne infections and that staff must take great care in the collection and disposal of this type of material. For the safety and well-being of the employees, any staff member dealing with needles, broken glass etc. must treat them as contaminated waste.
-
- Parents of children requiring needles as part of managing a medical condition should supply the nursery with an approved sharps box for safe disposal. Full boxes will be returned to the parents.
- If a needle is found, e.g. in the nursery grounds, the local authority must be contacted to deal with its disposal.

Personal protective equipment (PPE)

The nursery provides staff with PPE according to the need of the task or activity. Staff must wear PPE to protect themselves and the children during tasks that involve contact with bodily fluids. PPE is also provided for domestic tasks. Staff are consulted when procuring PPE to ensure all allergies and individual needs are supported and this is evaluated on an ongoing basis.

Dealing with blood

We may not be aware that any child attending the nursery has a condition that may be transmitted via blood. Any staff member dealing with blood must:

- Always take precautions when cleaning wounds as some conditions such as hepatitis or the HIV virus can be transmitted via blood
- Wear disposable gloves and wipe up any blood spillage with disposable cloths, neat sterilising fluid or freshly diluted bleach (one part diluted with 10 parts water). Such solutions must be carefully disposed of immediately after use.

Food safety and play

Children are supervised during mealtimes and food is adequately cut up to reduce the risk of choking. The use of food as a play material is always directly supervised. These are risk assessed and presented differently to the way it would be presented for eating, e.g. in tuff trays.

Food items may also be incorporated into the role play area to enrich the learning experiences for children, e.g. fruits and vegetables. Children will be fully supervised during these activities.

Food that could cause a choking hazard, including raw jelly, is not used.

We treat our responsibilities and obligations in respect of health and safety as a priority and provide ongoing training to all members of staff which reflects best practice and is in line with current health and safety legislation.

This policy is updated at least annually in consultation with staff and parents and/or after a serious accident or incident.

Transporting children to hospital procedure

The nursery manager or staff member must:

- Call for an ambulance immediately if the injury is severe. We will not attempt to transport the injured child in our own vehicles**
- Whilst waiting for the ambulance, contact the parents and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child, taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.
