

## **Sustainability and Climate Change Policy**

### **Policy Statement**

We are committed to caring for the environment and teaching children how to look after the world around them. We aim to reduce waste and use resources responsibly in our nursery.

### **What We Do**

We will:

- Use energy and water carefully – turn the lights off and use washing up water for the garden
- Reduce, reuse, and recycle where possible – junk modelling and crafting
- Choose safe and environmentally friendly resources when we can
- Reduce food waste – use up and eat up

### **Learning for Children**

Children will be supported to:

- Learn about caring for nature through play and stories
- Take part in simple activities such as gardening, and recycling
- Respect plants, animals, and the environment – litter picking, feeding the birds

### **Working with Families**

We will share information with families and encourage sustainable choices at home.

### **Review**
